**Biographical Sketch**

Marianne (Marika) Ainley (nee Gosztonyi) 1937 - 2008 was born on December 4, 1937 in Budapest, Hungary. She started out her adult life as a chemist after receiving her diploma in industrial chemistry from Petrik Lajos Polytechnical College of Chemistry in Budapest in 1956. She immigrated to Sweden in 1956 to escape the unrest accompanying the failed Hungarian Revolution, and then to Montreal, Quebec in 1957.

In Montreal, she worked as a laboratory technician during which she studied aesthetics, music appreciation and literature at Sir George Williams University (now part of Concordia University) from 1961-1964, earning a bachelor's degree in English and French literature. In 1966, she became a research assistant at Loyola College (now part of Concordia) in the Chemistry department under Dr. Thomas Nogrady. She worked under Dr. Thomas Nogrady from 1966-1969 and 1973-1974, taking a hiatus for the birth of her son during which she developed her interest in birding and pottery. Between 1967 and 1969, she studied pottery under Grace Atkinson and Rai Nakashima at the Potter's Club in Montreal. She exhibited some of her pottery at the Potter's Club in the Montreal Studio Fair. In 1974, she became a laboratory instructor in the Chemistry Department at Loyola College where she worked until 1978.

In 1979, upon the recommendation of a colleague to look into the History of Science Program (Histoire et de sociopolitique des sciences) at the Université de Montréal, Ainley applied and was accepted. While attending the Université de Montréal, Ainley was employed as a research assistant in the History of Science Program at Concordia and completed Cornell University's certificate in ornithology. She graduated with a Master of Science in 1980 from the Institut d'histoire et de sociopolitique des sciences of the Université de Montréal upon the completion of her thesis on the history of American ornithologists, "La professionnalisation de l'ornithologie Américaine, 1870-1979." Ainley continued her research in ornithology while completing her PhD at McGill University, graduating in 1985 upon the completion of her dissertation, "From Natural History to Avian Biology: Canadian Ornithology, 1860-1950."

Shortly after completing her PhD, Ainley received a grant to write a biography of zoologist William Rowan. In the same year, she applied for and received post-doctoral funding from the Social Sciences and Humanities Research Council (SSHRC), which she spent at McGill studying the history of Canadian women in science. She also co-curated "the Bicentennial of J.J. Audubon" exhibition at McGill University.

In 1986, she secured multi-year funding (from 1986-1988) as an independent scholar through the Women and Work Strategic Grants program for "Women and Scientific Work in Canada, I."

In 1988, she became a lecturer at the Simone de Beauvoir Institute at Concordia University and, in the following year, received her second Women and Work strategic grant for "Women and Scientific Work in Canada, II," which funded her research until 1992. In her first semester at the Simone de Beauvoir Institute, while developing a course on historical and contemporary perspectives of women, science and technology, she recognized a dearth of material on the subject and solicited a series of essays, which became *Despite the Odds: Essays on Canadian Women and Science*. Ainley edited the book, published in 1990, and contributed a chapter and bibliography. In the same year, she became a visiting scholar in the women's studies at Carleton University as well as a researcher for and curator of the "Canadian Achievements in Science" historical photograph exhibition at Concordia University. Upon returning to the Simone de Beauvoir Institute in 1991, she became the principal and a half-time associate professor of women's studies. She began work as a co-investigator on another SSHRC funded project, "Critical Turning Points: Women Engineers Within and Outside the Profession," on women in the field of engineering in 1993. In the same year, she received a grant to publish her biography of William Rowan, entitled, "Restless Energy—A Biography of William Rowan, 1891-1957."

In 1995, Ainley accepted a position as a professor and the chair of the Women's Studies Program at the University of Northern British Columbia, serving as chair until 1998 and as a professor until 2003. In 1999, Ainley became the president of the Canadian Women's Studies Association, of which she was a member since 1988. In 2000 and 2003, Ainley was a visiting professor at the Centre for Social Science Research at the Central Queensland University. In 2001, Ainley was a visiting scholar at Auckland University's Institute for the Study of Gender; she received associate professor emeritus status from the University of Concordia; and received the "Teaching as if the World Mattered" award from the Biology as if the World Mattered Research Group in Canada. In the same year, she received a SSHRC grant for her research project, "Re-explorations: new perspectives on gender, environment and the transfer of knowledge in 19<sup>th</sup> and 20<sup>th</sup> century Canada and Australia."

During her time at the University of Northern British Columbia, Ainley began her magnum opus, originally titled, "Overlooked Dimensions: Women and Scientific Work at Canadian Universities, 1884-1980." The book drew on her previous research, including research from her Women and Work SSHRC grants and "Critical Turning Points: Women Engineers Within and Outside the Profession," as well as oral history projects completed by other researchers and institutions. The book provides an overview of the history of women and scientific work at Canadian universities. It was posthumously published as *Creating Complicated Lives: Women and Science at English-Canadian Universities, 1880-1980* by the McGill-Queen's University Press in 2012.

She continued her artistic pursuits and birding at the University of Northern British Columbia. She studied watercolour under Jennifer Ferris, Barry Rafuse and June Swanky Parker, drawing under Mary Richer and acrylics under Marlene Roberts between 1997 and 2001. She exhibited works at a variety of

venues in Prince George from 1997-2000, including an exhibition at the Prince George Art Gallery in 1999, and exhibitions at the British Columbia Festival of Arts from 1998-2000. She was part of the Artists' Workshop in Prince George from 1997-2004. She served on the University of Northern British Columbia Arts Council between 1998-2004, curating two exhibitions on Canadian achievements in science in 1996 and 1997. She was voted elective member of the American Ornithologists' Union 1996, having joined in 1972 and having been a centennial committee member from 1982-1983.

In 2004, Ainley moved to Victoria where she became an adjunct professor of Women's Studies at the University of Victoria. In 2005, she received professor emeritus status from the University of Northern British Columbia and joined Studio Madrona, an artist group, with whom she exhibited work in Goward House in Victoria in 2005.

On September 26, 2008, Ainley passed away after a battle with cancer.

### **Names**

Marianne Ainley's birth name is Marika Veronika Gosztonyi. She anglicized her first name to Marianne in 1979 and published, predominately, under the names Marianne Gosztonyi Ainley and Marianne G. Ainley. She continued using her given name Marika for select personal and professional communications.

### **Custodial History**

Material donated before Marianne Ainley's death was in her custody before being transferred to the Northern B.C. Archives & Special Collections at the University of Northern British Columbia. The first donations of material, in 2002 and 2003, were donated by Marianne Ainley. Subsequent material was in the custody and control of Ainley's family as well as Geoffry and Marlene Rayner-Canham. Material was transferred to the archives in 2009, 2010, and 2011 by David Ainley and by Mark Ainley and Vicki Ainley in 2013. Geoffry and Marlene Rayner Canham transferred the source material, originally in Ainley's custody, for the completion of Ainley's monograph, *Creating Complicated Lives: Women and Science at English-Canadian Universities, 1880-1980*, in 2014.

### **Scope and content**

Fonds reflects, predominately, Ainley's research as a professor at the University of Northern British Columbia and her administration of the women's studies program at the University of Northern British Columbia. Her research is arranged by project into eleven subseries. Research material includes: photocopies of publications and archival material, correspondence, bibliographies, research interviews, transcripts, draft manuscripts and other records. A series of personal records, arranged according to type, includes: correspondence, diplomas and photographs. The women's studies administration material is arranged according to the major activities with which Ainley was involved and includes:

meeting minutes, memoranda, reports, correspondence and other records. A series of electronic records relating, predominately, to Ainley's research includes: draft manuscripts, conference proceedings, bibliographies, transcripts, correspondence, curricula vitae and other records.

**Series Level Descriptions****2002.14.1** Research projects

1973-2007

2.20 m of textual records and other material

**Scope and content**

Series documents academic research undertaken, predominately, while Ainley was a professor of women's studies at the University of Northern British Columbia and after her retirement. It contains research material from projects in Ainley's main areas of research, the history of ornithology and the history of early and contemporary women scientists, as well as research on the relationship between early women scientists and Aboriginal peoples. The series is arranged into eleven subseries: American Ornithologists' Union centennial history monograph; Louise de Kiriline Lawrence and Doris Huestis Speirs correspondence monograph; Scientists vs. government experts: The wood buffalo controversy, 1920-1991; Field work and family: North American women ornithologists, 1900—1950; Marriage and scientific work in twentieth-century Canada: the Berkeleys in marine biology and the Hoggs in astronomy; Catharine Parr Traill; Critical turning points: women engineers within and outside the profession; McGill University women's biographies; Re-explorations: new perspectives on gender, environment and the transfer of knowledge in 19th and 20th century Canada and Australia; Mabel F. Timlin; and Creating complicated lives. Series consists of photocopies of articles; correspondence; bibliographies; draft and published versions of articles, conference proceedings and monographs; interviews; transcripts; recordings of conferences; statistical data; questionnaires; consent, submission and other forms; pamphlets and other material from conferences; and notes.

1974-2007

8 cm of textual records

**Scope and content**

Subseries contains material relating to an uncompleted monograph about the history of the first 100 years of the American Ornithologists' Union. The project was originally proposed to the centennial committee of the American Ornithologists' Union in 1979 and was to be completed by Keir Sterling and Charles H. Blake. Ainley was invited to join the project in 1981, shortly after which Charles Blake passed away. In 1987, the project was abandoned, but was then revived in 2003 for the 125 year anniversary based on a revision of the original manuscript and new additions to cover the period of 1983-2008, before being abandoned for a second time. Series consists of correspondence relating to the research, editing and publication of the monograph and the unpublished manuscript from the revived project.

& 20-21**

[between 1993-2001]

1 m of textual records and other material

**Scope and content**

Subseries documents "Critical Turning Points: Women Engineers Within and Outside the Profession," a study funded by a Social Sciences and Humanities Research Council (SSHRC) strategic grant. The study was broken up into four projects: "Women in Engineering: A Historical Overview," a project based on analyzing statistical and demographic data to establish a statistical profile of women in engineering; "The Explorers: Early Women Engineers," a project based on conducting oral histories and examining archival material to establish the reasons for early engineers choosing their careers; "Women's Exit from Engineering Studies," a project based on using semi-structured interviews to analyze reasons for women departing from their degree programs; and "Women's Exit from the Engineering Profession," a project based on open-ended unstructured interviews of former male and female engineers to analyze their reasons for leaving the profession. Ainley was a co-investigator on the study, along with the principal investigator, Peta Tancred, and co-investigators Susan Whitesides and Gillian Rejskind, and was involved in all the projects, except, "Women's Exit from Engineering Studies." Subseries consists of audio tapes and transcripts from interviews with female engineers, questionnaires from a project on Queen's University female engineering graduates by Alison Bowe, research notes, articles, conference proceedings, brochures and correspondence.

**Note(s):**

*Source of supplied title:* Title based on contents.

*Physical description:* Includes: 28 audio cassettes, 2 photographs and 1 computer disk.

*Language:* Some material is French.

*Arrangement:* Most of the audio cassettes were stored with the corresponding paper material 2002.14.1.7.40 - 2002.14.1.7.72, but some were in a separate box. The archivist brought together the tapes and related material to create files for the tapes stored in a separate box.
